

VERAGON™ V900 WPS

THE VERAGON V900 WPS IS A FULLY AUTOMATED PACKAGING SYSTEM THAT IS CAPABLE OF BAGGING UP TO 900 PACKS OF WATER PER HOUR IN BIODEGRADABLE PLASTIC BAGS.

Veragon's V900 WPS (Water Packaging System) uses a biodegradable plastic composite material for the packaging which, in addition to having considerable strength, works as a shield against UV rays.

From a logistical point of view, one plastic roll (weighing 10 kg), can produce up to 3,000 one litre packs, which is the equivalent of two pallets of bottled water. This provides significant economic benefits (purchase, transport, logistics, disposal of empty bottles) and will create a significant saving on CO₂ emissions.

The machine has state of the art control management which allows for remote monitoring via the PLC-HMI system (available in top spec Air to Water generators).

V900 WPS TECHNICAL FEATURES

USABLE FILM	Double layer OPA / 12+LDPE / 80
PACK VOLUME	From 100 mL to 2,000 mL
RATE OF PRODUCTION	12 packs (500 mL) per minute or 8 packs (1 L) per minute
PACK HEIGHT	Max. 280 mm
PACK WIDTH	165 mm
TYPE OF POWER	220 Volt. 50/60 Hz
INSTALLED POWER	2,000 VA
MACHINE SIZE	75 cm x 100 cm x H 150 cm
WEIGHT	110 kg
CERTIFICATION	CE
WARRANTY	12 months
